B17

ADAPTORS

This high-quality fitting ensures a tight and reliable junction for surface-mounted or embedded conduit installations.

20mm Male Adaptors

B326

25mm Male Adaptors

B327

COUPLINGS

Straight conduit fittings are used to join two lengths of 20mm conduit for an extended and continuous electrical run. Designed for strength, durability, and ease of use, this fitting provides a neat, seamless connection for both surface and embedded conduit systems.

20mm Couplings

B332

25mm Couplings

B333

32mm Couplings

B334

SADDLES

A reliable conduit mounting clip designed to firmly secure conduit pipes to walls, ceilings, or other surfaces. Suitable for indoor and outdoor use, it ensures a clean, professional installation and prevents conduit from sagging or shifting.

20mm Saddles

B337

25mm Saddles

B338

32mm Saddles

B338A

LIDS

Designed to securely seal and protect electrical conduit junction boxes. Made from durable, non-conductive PVC, it ensures safety and a professional finish across surface-mounted electrical installations. Perfect for use in residential, commercial, or industrial environments.
